(i) Estimates assume that the €1bn SMCN (to be approved by the EGM scheduled on 30 January 2010) is fully subscribed and converted into shares.

Note: the pro-forma capital ratios are calculated assuming no dividend distribution.

Main features of the “Soft Mandatory” Convertible Notes

On 23rd of November, the BP Management Board approved the request to a to-be-convened EGM a mandate, pursuant to art. 2420-ter of the Italian Civil Code, to issue a “soft mandatory” convertible bond to offer in option to the shareholders and to the holders of the convertible bond “Banco Popolare Prestito Obbligazionario Convertibile subordinato (“TDF”) 4.75% 2000/2010 – ISIN IT 0001444360” with the following main features:

- **Issue size:** up to maximum Euro 1bn
- **Size of the capital increase:** maximum Euro 1bn including the share premium, through the issuing of new ordinary shares with a nominal value of Euro 3.60
- **Duration:** approximately 4 years
- **Status:** unsubordinated notes of the Issuer (*senior ranking*)
- **Coupon:** fixed interest rate
- **Conversion rights:** not before 18 months the bondholders can exercise the right to request a conversion into BP ordinary shares of all, or part of the held convertible bonds. Possibility to offer a cash option (the Issuer can decide to fulfill the obligation of delivering BP shares, after the exercise of the conversion right, by paying an amount of cash)
- **Early redemption of the option by the Issuer:** after 18 months, with a premium on the nominal value of the convertible bonds through the payment of a cash amount and/or the delivery of BP shares
- **Final redemption:** on the expiry date the convertible bonds which were not previously converted during the conversion period will be redeemed at a value not below their nominal value, through the payment of a cash amount and/or the delivery of BP shares on the basis of the current market value of the shares (to be determined on the terms of the bond considering the liquidity of the shares at that time)
- **To be listed** on the Mercato Telematico Azionario of Borsa Italiana, either upon the issue or any time thereafter

Comments

- Recurring total revenues: **+26%** yoy
- Recurring profit from operations: **+28%** yoy
- Strong growth of the recurring net financial result (see pag. 21 for details)
- The increase in the recurring operating costs is due to:
 - the sale and lease-back contract on operating RE assets finalized in 2008 with a pre-tax profit of +€500m
 - the elimination of the exemption for the invoicing of intragroup services, which impacted for about +€45m.

Note:

- The consolidated income statement as at 30/09/09 includes for the first time Banca Italease figures solely for the Q309, following the PTO closed successfully in July 2009. For a more detailed income statement please see pag. 32 in appendix.
- The difference between accounting and recurring 2009 data is mainly due to the results of the fair value option of own liabilities (-€333.3m pre-tax as at 30/09/09), which is a non-cash item (see pag 43).

Key messages: recurring data 'standalone'

- Recurring net income reaches €403.2m in the first 9 months of 2009, showing a growth of about 9% in comparison with the corresponding figure of 2008 (€371.4m).
- Healthy trend in recurring operating performance:
 - Total income of €3,000m: +10.9% (+12.2% proforma).*
 - Operating profit of €1,198m: +25.9%.
- Strong growth in the recurring net financial result, which reaches €602,3mIn (+577,3m with respect to the nine-month period of 2008).
- Costs are under control:
 - Personnel expenses decreased 0.5% y/y;
 - Administrative expenses, excluding the negative impact of intergroup VAT and of rental costs starting from 2009 in relation to operating real estate assets (disposed of as part of the Eracle RE fund), decrease by 3.4% y/y. Excluding these items of discontinuity, administrative expenses rise 12.4%.
- Asset quality remains satisfactory: the annualized cost of the risk stands at 70bps in the first nine months of 2009, in line with the 2009 budget.

* Pro forma for the disposal of 33 Tuscany-based branches.

Direct customer funds: growth in the retail segment

Total Group direct customer funds (period-end data)

o/w: direct cust. funds of the Banks of the Territory

o/w: wholesale funding (EMTN and London)*

Comments

- Group total direct customer funds increased slightly with respect to year-end 2008 (+0.6%) and registered a strong growth with respect to 30/06/09 (+3.2%).
- Increase in core deposits (households and small business segments) of 4.9% since year-end 2008 and of 2.1% with respect to mid-2009.
- From Q3 2009, following the significant improvement of Banco Popolare's credit standing, the Group turned issuing on the institutional markets (EMTN/ECP/ECD), thereby increasing its capability of placing other products through the retail commercial network.

* Figures exclude funds of Efibanca, Banca Aletti and other minor.

Largely replicable
Core business

Strong performance of proprietary portfolio and trading activities, influenced positively by:

- capital gains generated from hedging positions for a falling interest rates for an amount of about €120m. These positions were closed almost fully in the month of May 2009;
- capital gains for about €175m recorded by the management of the proprietary securities portfolio (mainly low-risk bonds; see details of the proprietary portfolio in the appendix);
- capital gains of €76.0m generated by the re-purchase of Banca Italease financial liabilities in Q3 2009.

Operating costs: non-personnel expenses

Analysis of total other expenses...

Personnel expenses

Comments

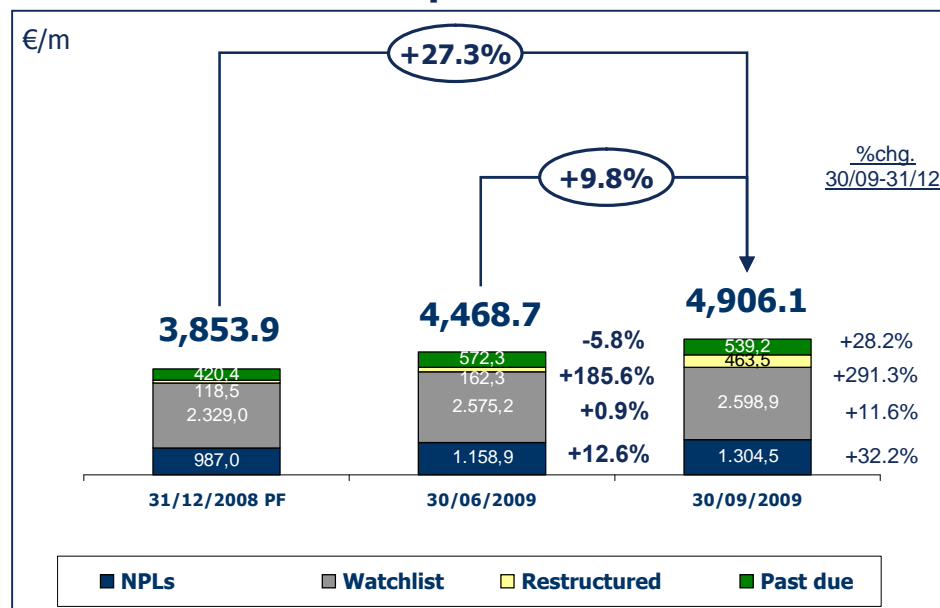

- The increase in total non-personnel expenses (+8.2% y/y) is due to two discontinuity factors:
 - elimination of the VAT exemption for the invoicing of intragroup items, which amounted to €45.0m in the first 9M 2009;
 - higher rental costs for a total of €37.5m in relation to the disposal of real estate assets finalised in December 2008.
- Excluding these discontinuity factors, cost reduction process continued: -€17.6m y/y
- Going forward, a reduction of about €10m is expected in relation to the invoicing of VAT for intragroup services.

• Watchlist loan coverage:	20.7%	26.4%
• Coverage of 'Past Due'	4.4%	12.0%

NPL coverage includes write-offs.

Comments

- The increase of gross impaired loans in Q3 2009 can be attributed to restructured loans, essentially in relation to 3 loan positions for which a capital increase has already been either closed or is in the process of finalisation.
- NPL coverage reaches 92% including real estate collateral; 70.7% excluding collateral but including write-offs.

N.B. Watchlist loan data as of 31/12/2008 have been adjusted in order to include about €503m which had already been subject to provisions in the FY 2008 accounts, but which were classified into the watchlist loan category only in Q1 2009 (see page 71 of the Group's 2008 Annual Report and Q1 Results Presentation). 'Past due' is referred to positions with a payment delay of more than 180 days.

Banca Italease

Banca Italease: reorganisation completed

- 08 July 2009: closure of the Public Tender Offer on Banca Italease with a 88.127% stake held by Banco Popolare; since 30 September 2009 Banca Italease is **consolidated on a line-by-line basis**.
- 31 December 2009: **legal effectiveness** of the Banca Italease reorganisation.
- 08 January 2010: **€1.2bn capital increase finalised. Banco Popolare increased its stake in Banca Italease from 88.127% to 91.397%**, following the exercise of option rights on 30 December 2009.

Banca Italease: focus on NewCo 1 (Release) loan portfolio

Loan portfolio (leasing+mortgages) as of 30/09/2009

Loan breakdown by type of business

Comments

- NewCo 1 (Release) will be a company with a level of capital that shall be brought to about €400m after the start of operations, with the aim of reaching a total capital ratio of 7%.
- About 70% of the total leasing portfolio is concentrated in 34 larger real estate positions.
- Headcount of about 40 employees, fully dedicated to the management and recovery of credit risks.
- Various initiatives aimed at achieving a strong reduction of this portfolio (~1.5/-2.0bn) have in large part already been formally agreed.

Banca Italease: focus on loan portfolio post-conferments *

Loan portfolio (leasing+mortgages) as of 30/09/2009

Loan breakdown by type of business

Comments

- Recapitalisation to be implemented by year-end 2009 through a share capital increase of max. €1.2bn (approved by the Extraordinary Shareholders' Meeting on 12 Oct. 2009).
- The Core Tier 1 capital ratio of Banca Italease Group – after the conferments, excluding Factorit and post share capital increase – will reach about 10%.
- Strongly fragmented customer loan portfolio.
- Headcount of about 550 employees (about 400 excluding Factorit).
- The loan portfolio is expected to shrink by about 30% by the end of 2011 and by about 40% by the end of 2012.

* Remaining loan portfolio of Banca Italease, ie. after the conferments of loans into NewCo 1 and NewCo2, excluding Factorit.

Methodological notes

BANCO POPOLARE GROUP:

This part presents the income statement of Banco Popolare Group as of 30 September 2009, which for the first time includes Banca Italease figures related solely to Q3 2009.

This section is subdivided as follows:

- recurring data, which underline the trend in the core banking business trend;
- main extraordinary items: the negative balance can largely be attributed to the application of IAS accounting rules concerning the FVO; extraordinary items do not include any negative components linked either to the core commercial banking business or to the credit area;
- stated data of the income statement.

BANCO POPOLARE 'STANDALONE':

This part shows the consolidated income statement and balance sheet data of Banco Popolare on a 'standalone' basis (i.e. excluding the contribution of Banca Italease) in order to ensure the continuity of financial performance data presented in the past.

This section is subdivided as follows:

- recurring data, highlighting the trend in the core banking business;
- stated data of the P&L account;
- balance sheet data.

Key messages: accounting data 'standalone'

- Stated net income reaches €192.3m in the first 9 months of 2009, being influenced by the extraordinary items indicated in slide 15.

- Effectively, this amount is the result of the application of the fair value for the valuation of own liabilities (FVO) corresponding to -€333.3m pre-tax and -€225.6m after tax, which has risen significantly in the first 9 months as result of the improvement of Banco Popolare's credit standing; it is recalled that in the first 9 months of 2008 the FVO had instead translated into a positive contribution of €137.8m pre-tax and €97.3m after tax.

- It follows that:
 - Total income reaches €2.676,5m, decreasing 10.1%;
 - Operating profit amounts to €874.7m, declining 28.5% (with costs identical with the recurring level).

Consolidation of Banca Italease

As of 1st July 2009, following the end of the tender period into the Total Tender Offer launched for all of the outstanding common shares of Banca Italease, Banco Popolare acquired the majority shareholding and hence the control over the company. As a result, as of the second half Banca Italease joined Banco Popolare's consolidation scope, and was fully consolidated together with the other subsidiaries.

Therefore, the balance sheet of Gruppo Banco Popolare as at 30th September 2009 includes the assets and liabilities related to Gruppo Banca Italease. Note, that although the agreement signed by Banco Popolare, Banca Popolare dell'Emilia Romagna, Banca Popolare di Milano and Banca Popolare di Sondrio for the business restructuring and reorganization of Gruppo Banca Italease provides for the transfer in a new company of a business line made up of the performing loans and related assets and liabilities mainly deriving from leases and/or mortgages originated by the branch networks of the banks associated with Banca Italease, the assets and liabilities making up the business line under transfer were not posted under "non-current assets held for sale and discontinued operations" and "liabilities associated with discontinued operations" in the balance sheet as at 30th September 2009, as at the date of the quarterly report the financial statement of the business line under transfer is not available yet.

Discontinued operations include Factorit S.p.A..

The consolidated income statement of Gruppo Banco Popolare as at 30th September 2009 includes the contribution of Gruppo Banca Italease only with regard to the portion of operating income generated after 1st July 2009.

Owing to the above mentioned business combination, the consolidated balance sheet and income statement of Gruppo Banco Popolare as at 30th September 2009 are not readily comparable with the same financial statements as at 30th September 2008.

However, for the sake of comparability with the previous year, the operating results of Gruppo Banco Popolare as at 30th September 2009 show the contribution made by the companies belonging to Gruppo Banca Italease split from the contribution made by the companies belonging to the consolidation scope of Gruppo Banco Popolare before the acquisition of control over Banca Italease, so as to be comparable with the data referring to 30th September 2008 and previous periods.

Also balance sheet data are represented along a similar approach so as to make it comparable with the consolidated balance sheet as at 31st December 2008.

The income statement shown in this slide reflects the contribution of Banca Italease Group to Banco Popolare Group consolidated accounts.

The higher loss of €3.2m in comparison with the consolidated data approved by Banca Italease is explained by the consolidation differences resulting from the different extension of the underlying area of consolidation.

Other changes in the consolidation scope

After the end of the third quarter 2008, the consolidation scope underwent a number of changes. The main differences are the sale of Ducato S.p.A., Banca Popolare di Mantova S.p.A. and other minor companies. In order to make the comparison between the first nine months of 2009 with the same period last year easier, data referring to periods before 30th September 2009 have been adjusted to take into account the changes in the consolidation scope.

After 30th September 2008, other corporate actions were finalized, that have already been explained in the 2008 Annual Report, among which the sale of a business line comprised of n. 33 bank branches to Credito Emiliano and the transfer of 456 real estate units to the Eracle Fund, whose shares have been sold out to institutional investors. This transactions must be taken in due consideration when comparing the results of the various periods.

Fair value option

Changes in fair value measurement of financial liabilities under “fair value option”

In first quarter 2009, in the light of a confirmed pricing policy for the repurchase of financial liabilities aiming at the adoption of credit spreads in line with those outstanding at the time of issue, as is typical of liabilities sold to retail customers, when preparing the quarterly report on operations as at 31st March 2009, some changes were introduced in the fair value measurement of financial liabilities issued by the Group and designated at fair value, in particular with regard to the method used to calculate changes in Banco Popolare’s creditworthiness. As regards financial liabilities sold to retail customers, the past method was completely dismissed, replaced by the use of actual prices quoted on the secondary market of securities in issue. As a result of this change, 212 millions were charged to income for the first half, namely the profit recognized in financial years 2008 and 2007 on the fair value measurement of the financial liabilities under examination. As regards financial liabilities sold to institutional customers, the measurement method in use on 31st December 2008 was confirmed also for 30th September 2009.

- In Q1 2009, the FVO related on bonds issued on retail market has been reset.
- Since 01/07/2009 all new istitutional bond issues are evaluated with the hedge accounting method and no longer at fair value.
- The FVO continues to be applied on a nominal value of istitutional bonds equal to €5.4bn, for which a residual gain of about €41m remains as of 30/09/09.

Purchase Price Allocation of Banca Italease Group

Upon preparing this quarterly report, the Purchase Price Allocation (PPA) was calculated on a preliminary basis, as provided for under paragraph 62 of IFRS 3. Therefore, the difference between the business combination and the net accounting equity of Gruppo Banca Italease at the acquisition date was cumulatively recognized under a specific balance sheet item named "Temporary acquisition difference".

Once the initial recognition of the business combination is over, and its cost has been allocated to the assets, liabilities and contingent liabilities of Gruppo Banca Italease, all annual and interim reports published after the effectiveness date of the business combination shall be corrected.

Purchase Price allocation ex-BPI Group

In keeping with the relevant international accounting standard (IFRS 3), the income statement of Gruppo Banco Popolare includes the economic impacts from the Purchase Price Allocation – PPA under IFRS 3 relating to both the first nine months of 2009 and the prior year's quarters on a comparative basis. For the sake of a like-to-like comparison, please note that PPA impacts can be significantly different in the period under comparison. For a full and transparent disclosure, shown below are the impacts deriving from the recognition of profit adjustments reported by the income generation units acquired by Gruppo Banca Popolare Italiana due to the higher values recognized in the consolidated financial statements on the date of effectiveness of the merger as a result of applying the accounting standard IFRS 3.

- Net interest income: the P&L impact was – 119.4 millions on 30th September 2009 (-38.5 millions in third quarter) and -137.8 millions as at 30th September 2008, and is mainly attributable to the greater value recognized during PPA to loans acquired under the merger.
- Other operating income: the impact was – 33.0 millions as at 30th September 2009 (-10.6 millions in third quarter 2009) primarily represented by the amortization of intangible assets having a defined useful life recognized upon the PPA. The impact on the income statement as at 30th September 2008 was – 69.9 millions, of which 35 millions relating to the greater value recognized during PPA to a minority stake sold as part of our merchant banking business, and 34.9 millions to the amortization of the above mentioned intangible assets.

As a result, the income statements for the first nine months of the FY under comparison showed the following impacts:

- | | |
|---|---|
| • total income: | - 152.4 millions in 2009 e – 207.6 milioni in 2008; |
| • profit from operations: | - 155.5 millions in 2009 e – 211.8 milioni in 2008; |
| • income/loss before tax : | - 157.7 millions in 2009 e – 207.9 milioni in 2008; |
| • income tax: | + 52.3 millions in 2009 e +62.8 milioni in 2008; |
| • net loss on discontinued operations: | -3.0 millions in 2008; |
| • minority interest: | +7.7 millions in 2009 e +10.6 milioni in 2008. |

The overall effect on the consolidated net income comes in at -97.7 millions on 30th September 2009 and at -137.6 millions on 30th September 2008.

Non-recurring items

In compliance with the directives spelled out in Consob's Communication n. DEM/6064293 dated July 28th, 2006, the impact of non recurring items is highlighted in the report on operations.

Income items classifiable as non-recurring have generated a total negative impact of 204.3 millions on the operating result generated in the first nine months of 2009. The main non-recurring positive constituents are the profit on disposal of equity and other investments (115.0 millions gross of tax effect) and the dividend paid by Agos S.p.A upon distributing its 2008 earnings (22.1 millions), that were generated before the acquisition of the equity investment by Banco Popolare. Non-recurring negative constituents are the impact from the accounting value of financial liabilities in issue measured at fair value as a result of the improving creditworthiness of Banco Popolare in the first nine months of the year (-333.3 millions gross of tax effect), the charge associated with the commitment to make a contribution to the Guarantee fund for small and medium-sized enterprises (-21.7 millions gross of tax effect), a loss from discontinued operations (-24.4 millions net of tax effect), and the non-recurring charge generated by the decision to settle almost all tax litigations regarding the pre-merger conduct of some companies belonging to the former Gruppo Banca Popolare Italiana, by resorting to a fast-track composition with immediate tax audit and remedy (-57.5 millions).

Note, that in the third quarter, following the issuance of the "Tremonti bonds" and the payment of the first installment of the contribution to the Guarantee Fund for small and medium-sized enterprises, the entire amount of 21.7 millions that had already been charged to income in the second quarter had to be reclassified from provisions for risks and charges (where as a result the amount was written back) to other revenues.

Other explanatory notes

With regard to the pro-forma data referring to impaired and substandard loans, note that the calculation of the pro-forma data for 31st December 2008 took into account that the 2008 annual report already specified that performing loans included 502.7 millions loans that had been reclassified as substandard in the first months of financial year 2009. Therefore, for the sake of comparability, the amount was added to substandard loans, and as a result to the aggregate amount of impaired loans referring to 31st December 2008.
